# Per Mar MAC Managed Access Control

*"Guardians of People  
and Property for Life"*

## What is Per Mar's MAC?

MAC is Per Mar's Managed Access Control program offered from Per Mar's UL listed Central Station. MAC delivers a secure, efficient single door to multi-door electronic access control service without having to invest in and install a computer and software at your location to manage the system. MAC offers...

### Per Mar Managed Access Control

Per Mar will provide a "hosted and managed" access control service. Per Mar will administer all programming, cardholder database management and report services for you. This service is intended for the end user who does not have the time, resources, patience or desire to manage an access control system.

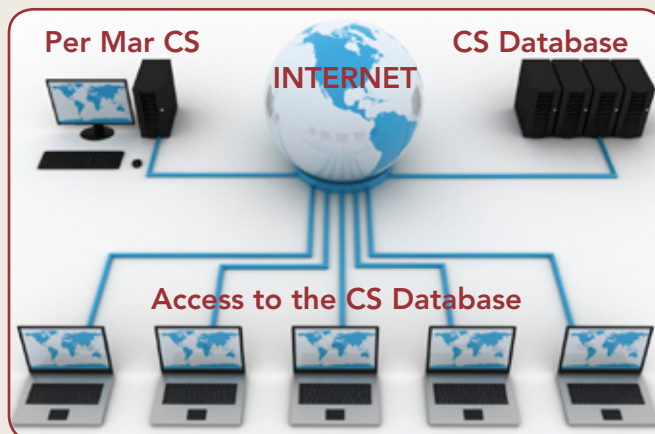

### Per Mar Customer Managed Access Control

Per Mar will provide a "hosted only" access control service. This service is intended for customers who recognize the value of eliminating the computer, software and associated maintenance from their location but prefer to manage the access control database themselves. This service allows the customer to gain entry to the database from any internet connected PC 24/7.

## Why is MAC unique?

Traditional access control systems require the installation of a dedicated computer and access control software at the user's location. They require the user to learn how to use the software to set schedules, create door groups, add persons to the access control database, run reports, initiate database backups and provide day to day management of the access control system. MAC eliminates these requirements

and provides our customers a secure facility without having to develop access control expertise. And, with the reduced costs of the MAC program, doors once considered too expensive for access control can now be included as part of your security program.

- No need to have an employee expert on how to use access control software
- Reduced equipment and installation costs
- No dedicated PC required
- No software required
- Program options suited to your needs

## Top 10 Reasons to

### "Let MAC Do It!"

- 1.** Lower Cost of Entry. MAC doesn't have days off, get sick or take vacation! The costs for Per Mar's MAC are lower than traditional access control systems but include the features and benefits you need.
- 2.** No dedicated PC Required. MAC has all the hardware at our UL listed Central Station. All hardware maintenance and upgrades are completed at the Central Station...and not your office.
- 3.** No dedicated Software Required. Per Mar hosts the software application so all database backups and software upgrades are completed at the central station...not your office.
- 4.** No Training Required. MAC will complete ALL database modifications for you. Or, if you choose to manage your own system, we'll show you how to add or delete a person from the database and how to generate a report.
- 5.** Per Mar will manage your access control system for you. No need for you to become an access control "expert". Just send us the change you need and MAC will take care of it for you 24/7, 365 days a year.
- 6.** Per Mar's MAC easily adapts to your changing business needs. Let us know what you need and we'll work with you to provide the products and services you require.
- 7.** Reduced on Site Service Call Costs. MAC eliminates all on site technical service requests for programming support, computer maintenance and software upgrades and support.
- 8.** Fully Featured. MAC provides all the benefits of a full featured access control system including controlling access to sensitive areas, easily adding and removing new and former employees from the access control database and reporting access control activity.
- 9.** Want to manage your own access control system? No problem. Per Mar's MAC Program supports customer managed access control with a simple web browser. Use Internet Explorer and connect with the access control database through Per Mar's website.
- 10.** Per Mar – Your Partner for Life. The highest quality services and products with a strong warranty from the premier security partner in the Midwest – Per Mar is the brand you can trust to meet your needs today and into the future.
