# COVERT CAMERA

**Let us solve the mystery!**

Have you ever had a situation where something was missing and no one knows where it went? Or had an employee who claimed something happened, but there were no witnesses? Do you know someone is stealing from you but cannot prove it?

When encountered, these are the types of challenges that require an outside source to assist in bringing resolution. Our team of investigators is prepared to work with you to assess the situation, determine camera placement, protect your assets and resolve your issue(s).

Our trained team will install Covert Cameras in designated areas to capture potentially harmful activity. We understand that installations need to be done after-hours, so we'll work around your schedule including nights and weekends.

Upon completion, we will provide you with written reports and DVD copies of the suspicious activity, putting you in control of disciplinary action where needed.

Per Mar Security Services' Professional Investigative Department has the tools you need to find out what is really happening at your business 24/7.

**Call us today for a consultation.**
